Post-booking Revenue Optimization

Benefits to Airlines

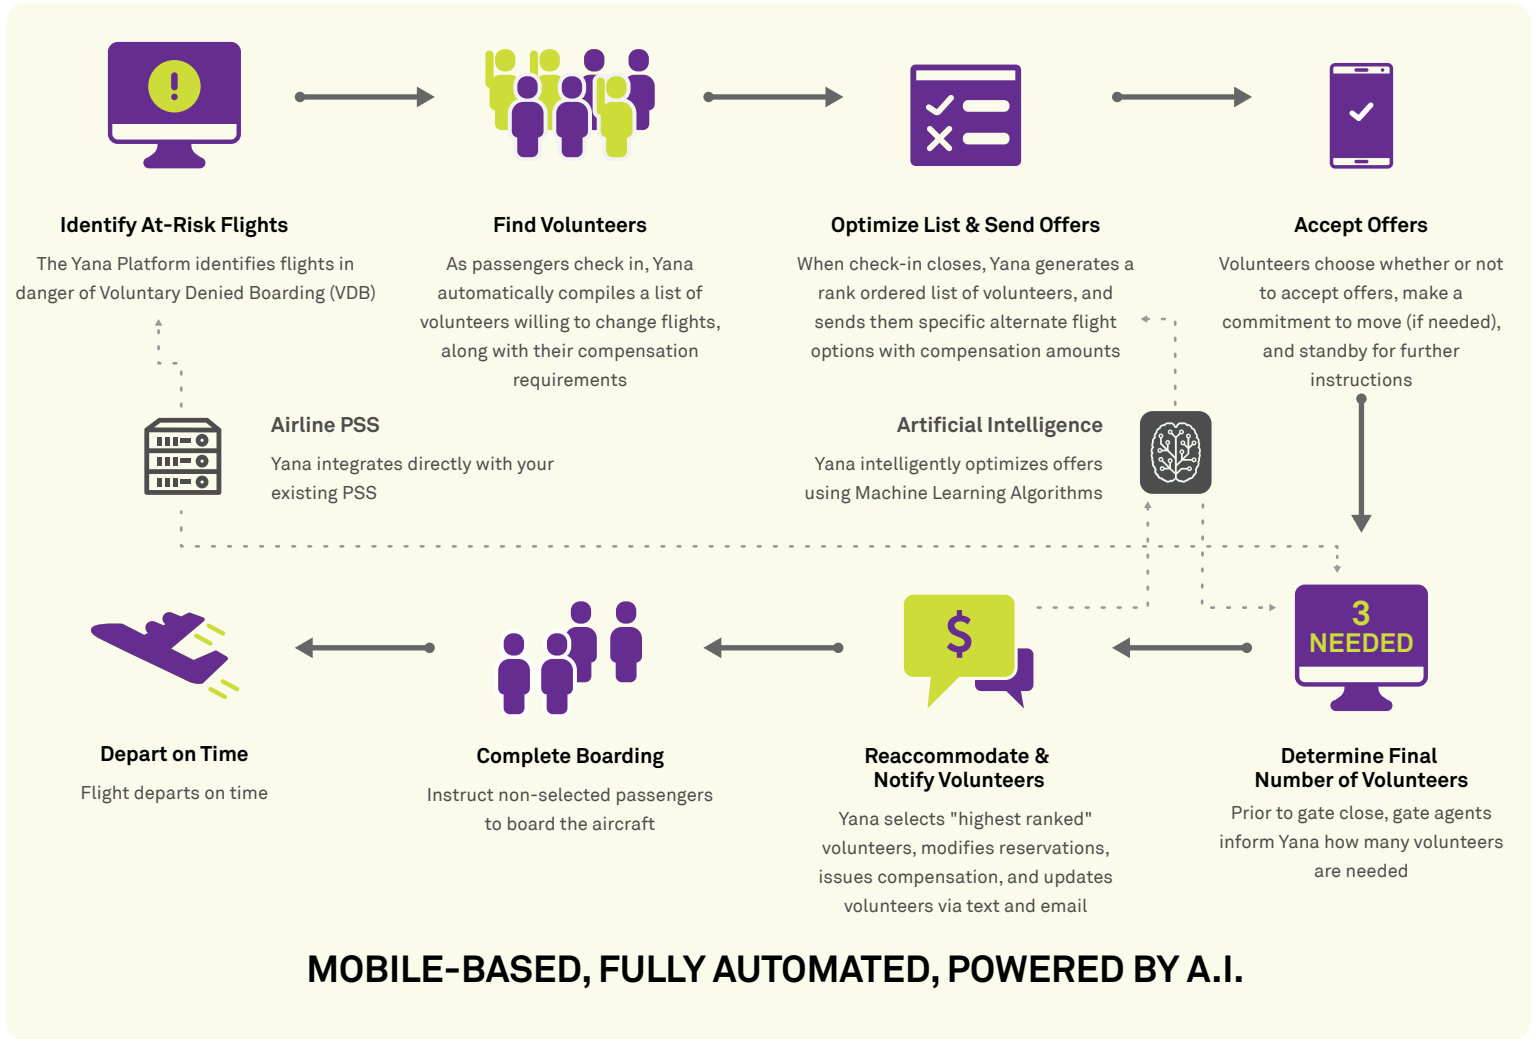

Increase unit revenues and optimize compensation costs

Benefits to Travelers

Reward passengers for their flexibility, and enable last minute travelers to fly when they need

Denied Boarding Protection

Benefits to Airlines

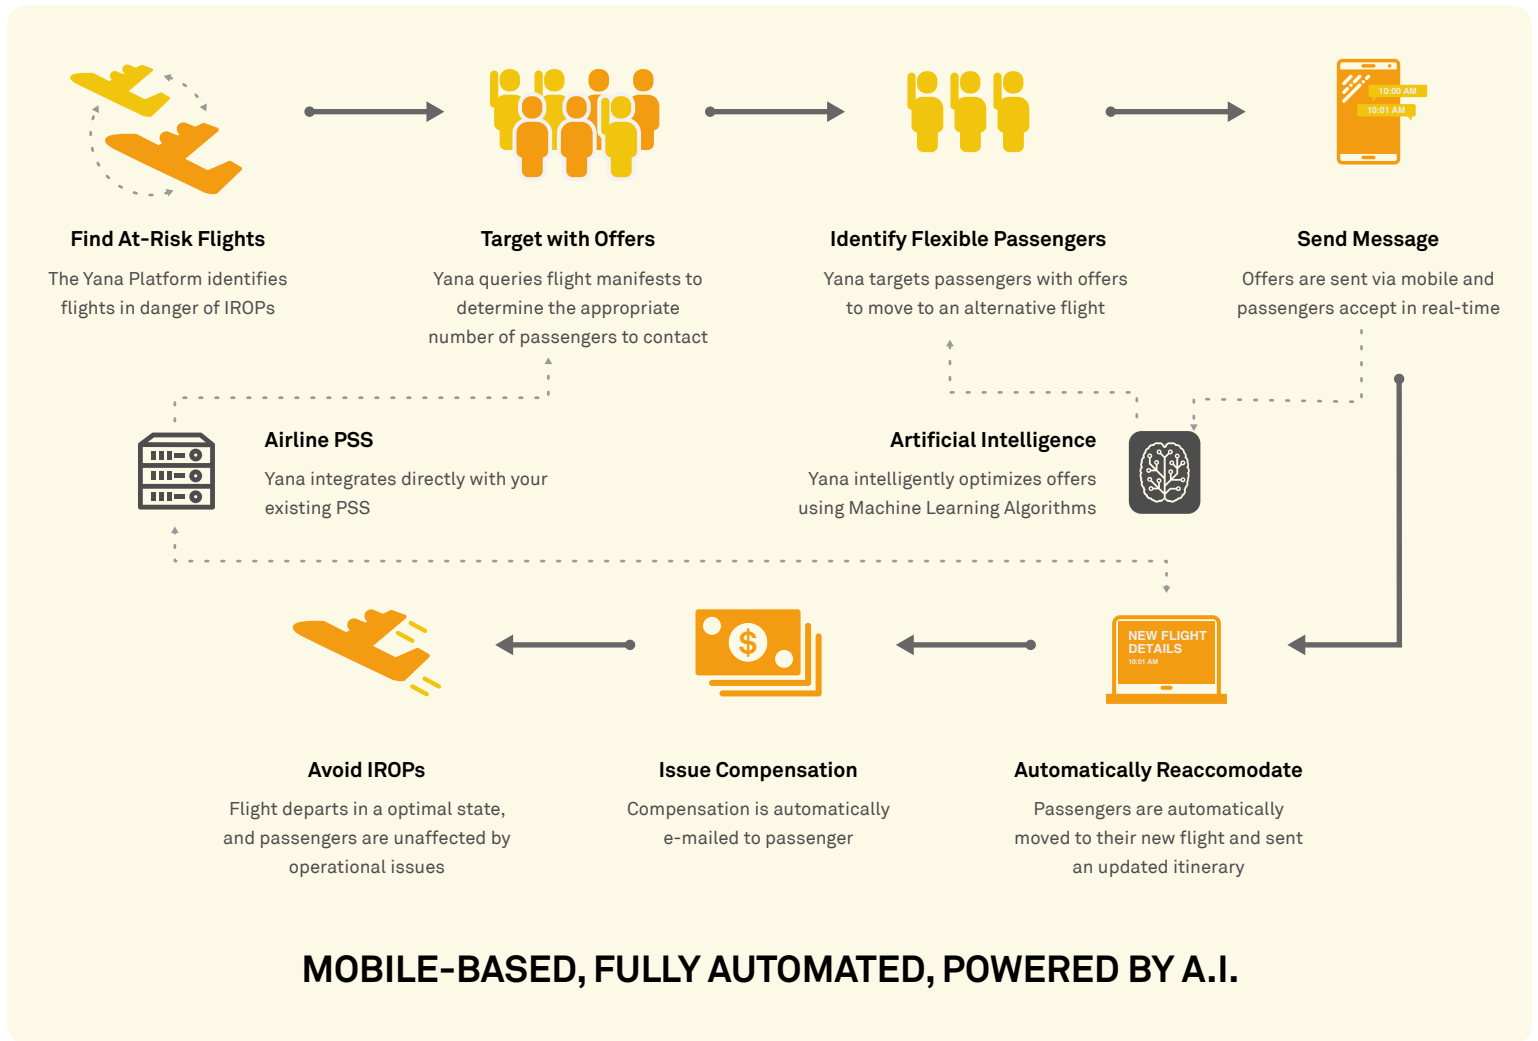

Optimize passenger compensation, reduce stress on gate agents with automatic processing, and improve on time performance

Benefits to Travelers

Streamline process for VDB, inject control and predictability into the travel journey, and complete the process from your mobile device

Irregular Operations (IROPs) Management

Benefits to Airlines

Reduce stress on front line staff and call center agents, and resolve IROPs more quickly and at lower costs

Benefits to Travelers

Provide greater predictability and control when disruptions occur, and reduce frustration and wait times for positive resolutions
